[ROGUE NASA! JOIN THE RESISTANCE!](#)

Designer James White (signalnoise) created this amazing logo for the @RogueNASA twitter account! RogueNASA is an anonymous group of scientists who banded together after the Trump administration attempted to censor the National Parks Service, Environmental Protection Agency, and Department of Agriculture. Since NASA does important climate science research, they created the account as a backup to keep the public informed in case the Trump administration attempts to censor NASA's climate scientists and science communications!

They needed a new logo, and designer **James White** stepped up beautifully.

Now, in cooperation with RogueNASA and James, **Nakatomi** is proud to present these limited edition Embroidered Crew Patches and Enamel Pins- available for **ONE WEEK ONLY**- with **ALL profits going to science education charities!**

These fully embroidered patches measure 4" in diameter, and will have an iron-on backing to attach it to your jacket or bag! Patches are \$12 each and are [available for pre-order HERE NOW](#).

The Enamel pins measure 1.25" in diameter. Pins are \$12 each, and [available for pre-order HERE NOW.](#)

These items will end on 2/7 at 12 Midnight Central time. [PRE-ORDER THEM HERE NOW!](#)
